As he moved in and out of various bands through high school/college, Bryan developed a unique songwriting style composed of many influences. During this time, he also grew experience as a composer, thus mastering the song process from start to finish. Before Cole was walking and talking, his parents realized he had great rhythm and pitch. While he was introduced to all types of music and instruments, Cole gravitated towards the harmonica for it's small size and fiddle like tones. Cole plays them upside down and is a quick study with new techniques and songs. ## How The Festival Got Its Name . . .

From the signal tower high atop the Navesink Highlands, that stood 250 feet over the treacherous entrance to New York Harbor at Sandy Hook, the watcher stared out in disbelief. On the horizon he spotted what could only be a heavily sparred ship. The anxious watcher focused in his telescope at the rapidly approaching tea clipper flying clouds of canvas that could only be the Sea Witch, scudding up the New Jersey coast. Her sleek black hull slicing through the choppy swells with the crew at last taking in her sails one after the other and running up her private signal. It was March 25, 1849 and there were no tea clippers due for another two weeks, but there was no denying that there was the Sea Witch back from her third voyage around the world. Robert Waterman had come romping back from China to New York in 74 days, 14 hours and beaten the tea fleet home. The waterfront was soon buzzing with the news. Within hours a pilot had come aboard the Sea Witch and guided the sleek black tea clipper to her moorings at the South Street wharf. The firm of Howland and Aspinwall would make a fortune at the tea auction and bask in the glory of a new record for the China to New York run. Again William Aspinwall's hunches and daring had paid off in a big way. With profits more than enough to pay for the building of another clipper. New York City went wild with the news of this latest recordbreaking run. The Commercial Advertiser wrote: "The splendid ship Sea Witch, Capt. Waterman, arrived here on Sunday in seventy-five days from China, having performed a voyage around the world in 194 sailing days. During the voyage she has made the shortest direct passages on record: 69 days from New York to Valparaiso; 50 days from Callao to China; 75 days from China to New York. Distance run by observation from New York to Valparaiso, 10,568 miles; average 6 2/5 miles per hour. Distance from Callao to China, 10,417 miles; average, 8 5/8 knots per hour. Distance from China to New York, 14,225 miles; average, 7 7/8 knots per hour. Best ten (consecutive) days' run, 2,634 miles; 11 1/10 knots per hour. "Waterman later wrote: "The model of the Sea Witch had more influence upon the subsequent configuration of fast vessels than any other ship ever built in the United States." Managed by:

The DE529 Education Savings Plan is offered by the state of Delaware and managed by Fidelity Investments. If you or the designated beneficiary is not a Delaware resident, you may want to consider, before investing, whether your state or the beneficiary's home state offers its residents a plan with alternate state tax advantages or other state benefits such as financial aid, scholarship funds and protection from creditors.

Units of the portfolios are municipal securities and may be subject to market volatility and fluctuation.

Please carefully consider the plan's investment objectives, risks, charges, and expenses before investing. For this and other information on any 529 college savings plan managed by Fidelity, contact Fidelity for a free Fact Kit, or view one online. Read it carefully before you invest or send money.

<sup>1</sup>Zero account minimums apply to self-directed brokerage accounts only. Account minimums may apply to certain account types (e.g., managed accounts) and/or the purchase of some Fidelity mutual funds that have a minimum investment requirement.
